#### **DETAILED ACTION**

### Election/Restrictions

Applicant's election with traverse of Group III (claims 5-9) in the reply filed on 10/24/2006 is acknowledged. The traversal is on the ground(s) that the search of one group would encompass the search of the other groups. This is not found persuasive because each of the claim groups would be classified in different and very distinct subclasses. A search of all of these separate subclasses would cause a serious burden to the examiner.

The requirement is still deemed proper and is therefore made FINAL.

## **Drawings**

The drawings are objected to because Figure 1 and Figure 4 contain number labeling errors. Figure 1 portrays a temperature sensor, Item 15, however also displays air coolers, Item 15. In the specification the temperature sensor is described as Item 16. Figure 4 refers to Items 185a and 185. The specification describes Items 186a and 186, which would be associated with the drawings. Item 185 is used to describe "holders" and it is unclear where these are in Figure 4. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes

Application/Control Number: 10/665,555

Art Unit: 1746

made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless – (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 5 is rejected under 35 U.S.C. 102(b) as being anticipated by Berndt (US Patent No. 6,086,635).

Berndt discloses a dry-cleaning machine having a heating coil (34) providing hot air, condenser (36) and a water separation unit (28) for removing water from a mixture of solvent and water where it is a coalescer type of filter (Fig. 4, Item 64; col. 5).

# Allowable Subject Matter

Claims 6-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Application/Control Number: 10/665,555

Art Unit: 1746

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not reasonably teach, suggest or disclose a water separation unit having a filter member which allows only the solvent to pass to the solvent storage chamber and a drainage pipe having a vertical part for bringing the water from the tank to a level higher than the bottom part of the tank and a horizontal part located downstream of the vertical part, where the highest point within the horizontal part is lower than the upper end of the solvent recovery pipe.

#### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art not referred to are Durr (US 3692467), who discloses a dry cleaner and water separator with a coalescer type filter, Radomyselski (US 20030070238), Berndt (US 6059845), Cannon (US 5213594), Fyvie (US 20030196282), Ohue (US 4707269), and Caputi (US 4664754), who disclose dry cleaning and water separators and/or coalescing. One additional reference is Aurelle (US 4335001), who discloses fluid separation and piping heights.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sarah E. Husband whose telephone number is (571) 272-8387. The examiner can normally be reached on M-F 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael E. Barr can be reached on (571) 272-1414. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
